2020 Daisy In Training Nominees...

SENTARA[®]

College of Health Sciences

Michelle Bravo

“Michelle is one of the kindest hardworking people you will ever meet. Her commitment to patients and also helping other students is remarkable. Always ready to jump in and help whether patient or another student. I have personally seen Michelle take extra time to educate patients and provide information about resources. She is very deserving of this award.”

SENTARA[®]

College of Health Sciences

Amanda Pearman

"Amanda is incredible. Her intelligence is off the charts but it is her care for others that is her most beautiful quality. She can empathize with patients because she survived a horrific auto accident while in high school and spent over a year in and out of hospitals recovering and having multiple surgeries. She will be an excellent Nurse. She possesses a huge heart and is kind down to her core. And she has been a patient. She understands all that it means. She is dogged in her determination to do the right thing for people. I have personally seen her elevate those around her and inspire them to be their best selves. A remarkable young woman!! Strong. Confident. Compassionate. Intelligent. Kind. Unstoppable. And above all she is humble. What an amazing person!!"

SENTARA[®]

College of Health Sciences

Marina Pickell

"There was a patient on the CICU that was in heart failure and awaiting a heart transplant. He had already been on the unit for a few weeks before Marina had him as a patient. As she got to know him during that first day, they had conversations about their faith and the things he typically loves to do. She found out that he loved art, but had not had the chance to do that since he was admitted to the hospital. The next day, Marina came to clinical with art supplies, including a coloring book filled with different bible verses. Her patient was so happy, and you could tell it made her just as happy too. Next week, we were there again, and her patient had left a book filled with his own poems for her with a very thoughtful message thanking her for her compassion towards him when he wasn't able to do the things he wanted to do."

College of Health Sciences

Tabitha Apeland

“Tabitha is great with her fellow nursing students. She is always willing to help when someone doesn’t understand something and takes time to explain it if she understands something. She is very supportive of her peers. If there was a time I missed class and asked my classmates for notes, Tabitha is always one of the first to help and is willing to go over the notes to explain anything that may be confusing. Tabitha is and always has been a team player and I wish I had the pleasure of being in a clinical with her. Tabitha is a wonderful classmate and for these reasons and more, deserves a nomination.”

Cameron Huston

“Cammy is very compassionate with her patients and all of the family members. She takes the time to spend quality conversations with them. She has an ease about starting conversations with her and always puts others first. She is dedicated to providing the best care. And often skips lunch (offers to eat later) so she can be with her patients during transport, difficult times, and discharge. She is inspiring.”

SENTARA[®]

College of Health Sciences

Kinue Brunton

“Kinue is always looking at how she can best care for patients. She has excellent critical thinking skills. Kinue always comes to clinical ready to learn and interact with her patients.”

SENTARA[®]

College of Health Sciences

Erin Bonney

“Erin is always working with patients, even those she wasn’t assigned to. She is always trying to find a way to help her patients, whether that be feeding, changing linens, or helping them get cleaned up for the day. Erin is always trying to find something to do every second of clinical. She’s always really sweet with her patients too. I know she’ll make a phenomenal nurse one day..”

SENTARA[®]

College of Health Sciences

Kristen Hudgins

“Kristen shows exceptional dedication in everything she does. She is compassionate and steadfast to all who are fortunate enough to know her. Her patients benefit from her kindness and devotion to detail. Kristen is a mother of three, one of whom was born during nursing school. She immediately resumed her focus at school and skillfully manages her duties as a mother, wife and student. She is encouraging to all of her friends and always goes the extra mile. She is passionate about patient care and is going to make a phenomenal nurse.”

SENTARA®

College of Health Sciences

Mary Bennett

“Since even before the start of nursing school, Mary has led the charge towards embracing this opportunity and providing encouragement and camaraderie to her fellow nursing students. She organized and maintains a facebook group that offers support, encouragement and education for her peers. Mary frequently organizes study sessions and provides childcare to fellow students who need a hand so they can take the proctored exams. Frankly, Mary is a rock. She solidly and staunchly supports everyone in her life and allows others to lean on her while simultaneously pushing and encouraging them to do their best. Mary does this all while her husband is deployed. In any ventures, Mary is the first one to volunteer, the last one to leave and always goes the extra mile. She is hungry to learn and looks for opportunities to do so. I have personally witnessed many times Mary has relentlessly pushed for the best course of action for her patient and provided excellent care. Mary will make a phenomenal nurse who will advocate tirelessly for her patients and devote her huge heart to all she does.”

SENTARA[®]

College of Health Sciences

Karen Brown

“Karen has the biggest heart. Every week in post conference she always shares what she discovered about the soul of the patient. It is easy to see that every patient she takes care of is unique and individualized to her. She sees them beyond their illness and strives to reach them on a level that is equally intimate and professional. Karen has the skills of a nurse that cannot be learned from a book or in a classroom- empathy, compassion, and integrity.”

SENTARA[®]

College of Health Sciences

Elizabeth Nevoraski

"Elizabeth is an exemplar of professionalism as a student and as a nursing care partner. She has been employed as an NCP on a unit that has been converted to a covid 19 unit. She has maintained a holistic approach to nursing as she has sought to meet the needs of patients in isolation without social support, attending to their physical, spiritual and emotional needs. She is keenly aware of the impact of isolation on the patients and works to address them with compassion and caring. She served as a plumber unclogging a toilet on the unit as the facilities staff were reluctant to enter. As she meets the needs of the community, she also strives to maintain her scholarly requirements. Above all she does it without complaint. On Monday evening she joined our asynchronous class, immediately after work, and all that sanitizing after working on a covid unit entails, with a cheerful and enthusiastic attitude. She is a rock star."
